## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Independent claims 24, 27, and 30 are allowable over the prior art since the cited references taken individually or in combination fails to disclose in particular a method for using a single sound card comprising, "presenting a plurality of virtual device drivers to a user with each virtual device corresponding to a selection of a set of speakers from a group of speakers in different locations including speakers located in at least two different rooms," associating a first application with at least one of the plurality of devices, associating a second application with at least one of the plurality of devices, and "the single sound card operative to simultaneously output audio according to the first speaker assignment and the second speaker assignment", where in claims 24, 27, and 30, the first application and second application referred to is a "media player" and "game software", a "video player" and "game software", and a "media player" and "video player", respectfully. As argued by Applicant on page 5 of the response dated October 14, 2008, "The claimed invention solves a problem in the prior art, namely that in many homes users have a computer system with multiple entertainment applications and also have multiple speakers located about the home in different locations, such as distributed ... in different rooms". Where again as argued by Applicant, the closest prior art of record, Slezak (US 6,647,119), "is directed to a fundamentally different problem, namely providing spatial location information... SLEZAK provides audio cues from a simulation sound source having a directional location". Since the sound source is

simulated about a user as illustrated in Figure 10 of Slezak, one of ordinary skill in the art at the time of the invention would not have found it obvious to modify the invention of Slezak to enable "the single sound card operative to simultaneously output audio according to the first speaker assignment [for the first application] and the second speaker assignment [for the second application]", where in claims 24, 27, and 30, the first application and second application referred to is a "media player" and "game software", a "video player" and "game software", and a "media player" and "video player", respectfully, to "a selection of a set of speakers from a group of speakers in different locations including speakers located in at least two different rooms". Therefore, Slezak and likewise the other references on record do not disclose the above patentably distinct limitations of independent claims 24, 27, and 30 and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the prior art to include all the limitations of independent claims 24, 27, and 30, respectfully.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
